

# AVAIL IDENTIFIES \$223,016 OF ANNUAL SAVINGS FOR REGIONAL HEALTHCARE COMPANY

## A Case Study

As one of the top-notch regional healthcare systems with over 300+ locations and 16,000 employees, this company services the Midwest with hospitals, care clinics, hospice care, sports and wellness, and more. The healthcare provider wanted to regain control of its telecom environment and identify cost savings.

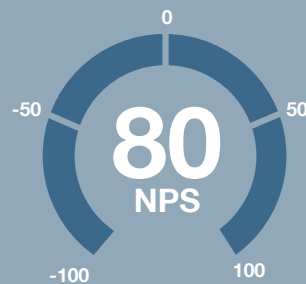

After Avail reviewed services and rates with the carriers, we provided a detailed inventory in our 4A platform. Our client was able to drill down on the data by location, service, cost, warranties, circuits, and more. The audit yielded considerable monthly and one-time savings, resulting in a return on investment in 30 days.

After an audit and inventory management, Avail decreased spend by 25% and provided annual savings of \$223,016.

## ROI = 30 Days

Avail delivers an unparalleled client experience.

With a Net Promoter Score (NPS) of 80, we rank in the top of technology lifecycle management companies in client satisfaction. We pride ourselves in five-star personalized service.

Avail's purpose-built platform and unparalleled managed services brings a sense of control and visibility throughout the entire IT lifecycle.
